Claims submitted with dates of service on or after December 1, 2015, through August 21, 2016, that denied will be automatically reprocessed. A future web announcement will notify providers when the claims are reprocessed.

Telehealth is the use of a telecommunications system instead of an in-person recipient encounter for professional consultations, office visits, office psychiatry services and a limited number of other medical services. The originating site is the location where an eligible Medicaid/Nevada Check Up recipient is at the time the service is being furnished via a telecommunications system.
