Web Announcement 1659

## **Modernization: Electronic Claims Submission for All Providers to be Implemented in February 2019**

The new, modernized Medicaid Management Information System (MMIS) will be implemented on February 4, 2019. The new system will improve electronic claims submission and enhance electronic options for users to alleviate the need for paper communication.

Effective February 4, 2019, providers will be required to submit claims to Nevada Medicaid by using the new Provider Web Portal Direct Data Entry (DDE) function or by using a Trading Partner (service center or clearinghouse) to submit their claims.

Some of the benefits providers will see with the new system will include:

- Ability to upload claims attachments via the Provider Web Portal
- Online submission of claim adjustments
- Ability to research claims and identify adjudication status in almost real-time
- Ability to submit ALL Third Party Liability (TPL) claims electronically

More information will be communicated through web announcements in the coming months regarding preparations needed to use the new system; training for users to review the benefits and processes of the new system; and reference documents to assist users.
