Nevada Medicaid Web Announcement 3097

Attention All Providers:

Guidance Regarding Group and Individual Provider Enrollment

The Centers for Medicare & Medicaid Services (CMS) has established [guidance](#) for providers obtaining National Provider Identifiers (NPIs) for both Individual and Organization Entity types.

- Individual Health Care Providers, including those with a Sole Proprietor business license type, may obtain a Type 1 - Individual NPI.
- Provider Groups, Single Member Limited Liability Companies (LLCs), and Incorporated Individuals must obtain a Type 2 - Organization NPI.

When enrolling with Nevada Medicaid, any entity that is operating as an LLC or Corporation must separately submit a group enrollment for the business and an individual enrollment for the provider(s) to link to the group. Only individuals operating as a Sole Proprietor may stand alone without linking to a group, as licensure allows.

Effective June 20, 2023, the Nevada Medicaid Online Provider Enrollment application will prevent providers from selecting the incorrect entity type. Any individual provider currently enrolled as a Corporation, LLC or Non-Profit entity will need to update this information upon their next revalidation or update.

Please note: When enrolling, your selected entity type must match the business structure reported to the Nevada Secretary of State.
