Nevada Medicaid Web Announcement 3511

Effective Enrollment Dates for Provider Types (PT) 17 (Special Clinics) Specialties 171 (Methadone) and 215 (Substance Use Agency Model (SUAM)) Transitioning to PT 93 (Substance Use Treatment)

Addendum to [Web Announcement 3497](#): Effective December 11, 2024, providers transitioning from provider type (PT) 17 (Special Clinics) specialties 171 (Methadone) and 215 (Substance Use Agency Model (SUAM)) to group PT 93 (Substance Use Treatment) specialties 704, 707, or 708 cannot backdate their enrollment effective date. The effective date for a new PT 93 group will be the date that the enrollment application is finalized, and the PT 17/171 or 17/215 contract will be terminated the day before the PT 93 enrollment is completed to avoid a gap in coverage. Providers should review their PT 93 provider welcome letter to obtain their enrollment effective date.

To avoid interference with billing and prior authorizations (PA), providers are instructed to continue submitting claims and PA requests under their current enrollment until the PT 93 application is complete. Once approved as a PT 93 group, providers may transfer any remaining units from active prior authorizations. Please refer to [Web Announcement 3362](#) for instructions.

Please note that this does not apply to PT 93 individual enrollment applications.
