Nevada Medicaid Web Announcement 3526

Attention Provider Type 93 (Substance Use Treatment): Individuals Must be Linked to a Group

Individuals enrolled with Nevada Medicaid as a provider type (PT) 93 (Substance Use Treatment) are required to be linked to an active PT 93 group. This individual provider type cannot stand alone.

Individuals who have enrolled without meeting this requirement will have 60 days from the date the enrollment application is approved to link to an active PT 93 group. A letter will be sent within 2 business days of the completed enrollment date notifying them of the missing linkage. Failure to update the group linkage will result in contract termination due to not meeting the conditions of participation.

To update the group linkage information, please log in to the secure Provider Web Portal (PWP) and submit an update request.

1. Log in to the PWP at <https://www.medicaid.nv.gov/hcp/provider/Home/tabid/135/Default.aspx>
2. On My Home page, under the Provider Services section, select the Revalidate-Update Provider link.
3. On Provider Locations page, select the Update Provider link to start an update application.

Refer to the Online Provider Enrollment (OPE) User Manual [Chapter 3: Revalidation and Updates](#) for instructions on updating provider information.
