

Web Announcement 46

Guidance for Vaccines For Children Program:

The links listed below offer guidance to providers for the Vaccines For Children (VFC) Program during the 2004-2005 influenza season. If a VFC provider elects to borrow vaccine or bill Medicaid for privately purchased vaccine, these forms must be completed to track replacement doses. Please note these forms are needed only when VFC or private vaccine must be replaced or Medicaid is billed because private vaccine was administered to a VFC-eligible Medicaid child.

Providers should archive these forms for their records as proof that vaccine was replaced and/or Medicaid billed. The recordkeeping forms are also accessible by selecting "Forms" from the "Providers" drop-down menu at <https://medicaid.nv.gov>.
